

Stainless and CD4MCu

Stainless steel replacement parts by PumpEng that won't send you broke. Dewatering in corrosive environments can eat into your site profits, the Raptor pump range of interchangeable parts with your old Flygt BS model will lower your pumping costs and extend your scheduled maintenance programme. How ????

As we know Stainless “ain’t” Stainless Raptor 8kw impellers are available in CD4MCu which has excellent resistance in corrosive-erosive atmospheres with increased hardness {HB250-270} equal to and in some environments superior to 316SS.

PumpEng manufacture a 5, 8 and 20kw underground dewatering pump specifically engineered for Australian mining conditions, all models are fitted with Stainless Outer Casings as standard. Following requests from the market the 8kw pump has been further developed with Stainless products & many of these are now available ex stock. Please feel free to contact us for existing Stainless products and/or your requirements in the development of new Stainless components.
